

Empowered by Innovation

What is NorthStar Cloud?

NorthStar is proud to offer our new managed cloud hosting solution, NorthStar Cloud. We have partnered with Amazon Web Services to bring you the latest cloud infrastructure from a leader in the industry. Moving to NorthStar Cloud puts our team of experts to work configuring, deploying, and managing your NorthStar applications. Your information is available anytime, anywhere, and on any device in an environment designed specifically for our applications.

Benefits of Managed Infrastructure and Applications

Cloud Infrastructure

- Leverage the power of our AWS experts to configure and deploy your NorthStar solutions in the cloud
- Maintain a modern technology architecture
- Access your data anytime, anywhere, and on any device
- Save money with a predictable, affordable IT budget

NorthStar Applications

- Improve your application performance with database management, patches, updates, managed backups, log file analysis, server updates, and resets
- Free up your IT personnel for other priority tasks
- Save money by leveraging our experienced DBAs and cloud specialists to maintain your application
- Rely on our robust CIS and suite of solutions to run your business in the cloud

"We evaluated several vendor technologies and spoke with a number of other utilities about their decision-making process and lessons learned. Having worked with NorthStar for almost a decade, I can tell you with confidence that we chose the best partner." Sam Clark, Customer Service Manager, City of Shelby

Why Choose the NorthStar Cloud?

We have tailored our cloud environment to our product specifications to ensure optimal performance and security. Each NorthStar Suite is protected in our Standard or Enterprise environments with customizations and external system integrations available in Enterprise, providing a safe, flexible place for your data. NorthStar Cloud offers:

The NorthStar Advantage

- Over 40 years of developing and delivering customer and information billing solutions designed for small- to medium-sized utilities.
- Engage and collaborate with our other 200+ electric, water, and gas utilities on new and innovative solutions at regional and annual user group meetings.
- Future proof your utility by partnering with an industry-leading vendor committed to significant investments in new and emerging technologies.
